- Rubble removal
- General non-structural building

Before the project

- By paying a deposit, you confirm acceptance of our T&C's at www.plumbglo.co.za. Take time to understand this quote and exactly what is included. If it's not on the quote it's not included. Any additional work (e.g. tiled skirting) must be specified on the quote.
- All quotes are "labour only if not stated otherwise" requiring you to provide materials unless otherwise agreed and specified on the quote. Ensure all materials are delivered before our team commences work. If you don't have all requirements (or they delivered incorrectly), delays and additional charges may apply.
- If you prefer, our Service Partner is able to join you at your chosen supplier to ensure you buying right.
- We all have differing standards and ideas on what the completed job should look like. Communicate requirements and expectations to your Service Partner clearly and continuously.
- **For projects where tiling is required, advise on your preferred pattern and centre line before commencement. Check continuously (no less than once a day) to ensure they working to your standards.**
- Be aware of product limitations. For example, ceramic tiles typically vary in shade and size and despite the best workmanship can't be made to look like expensive porcelain tiles.
- Projects can be messy. Remove furniture and valuables from the area. Use protective dust sheets/covers. We don't move furniture so please ensure this is done in advance.
- To ensure a safe working environment, keep children, pets and guests away from the working areas. Do not enter the working area whilst work is in progress or without the required safety and protective equipment and clothing. We cannot be held responsible for injury or loss due to unauthorised access to work areas.

During the project

- To ensure we meet your expectations, set up a time to meet your Service Partner once a day to provide feedback. Be sure you are happy with the project while it progresses as it's impossible to fix issues if you wait until the end to share your feedback.
- For issues, contact the office immediately (079 882 9336) so we can address your concerns. Prevention is better than cure!
- Sometimes we remove carpets/tiles to find the surface is in sub-optimal condition. In these cases, we recommend corrective measures before applying new tiles, vinyl or laminates. Unfortunately, we are generally unable to see the quality of the surface before removing existing coverings. This may lead to additional costs, not on the original quote. We make these recommendations to protect your investment and product guarantee. Should you choose not to follow these recommendations, we are unable to guarantee workmanship and product.
- CTM and Italtile use an average coverage ratio to estimate adhesive and grout quantities. Sometimes the job may require more. This is not caused by waste but rather by differences in the porousness, evenness or smoothness of surface we are working on.
- Should we need to remove and re-install fixtures (including sanware), this is charged separately.
- While we make every attempt to avoid damaging the existing fixture(s), we will not be held responsible for damages or breakage.

End of project

- We strongly recommend the use of appropriate sealants and protective coats. It may cost a little more, but you will be rewarded by the longevity of your investment.
- We do not apply sealants or protective coats unless specifically requested by you and detailed on our quote. Our team will complete a first (or second) clean-up but be prepared to continue this process yourself for up to 2 weeks before all traces of dirt are removed.
